

**Candente Copper Corp. updates status of  
Drilling Permit for Cañariaco Project**

Vancouver, British Columbia, October 12<sup>th</sup>, 2018, Candente Copper Corp. (TSX:DNT, BVL:DNT) ("Candente" or the "Company") has been advised that a recent change in Government regulations in Peru may allow the Company to re-initiate drilling under the permit originally approved in August 2014. This is the result of a new Government regulation *DL N°1394* (Sept 6, 2018) which has now given Environmental Certificates a validity period of up to 5 years. The company has requested confirmation from the Ministry of Energy and Mines ("MEM") and the Mining Environment Affairs Office ("DGAAM") that this Government regulation does apply to the Company's 2014 drilling permit.

"This change in Government regulations is much welcomed news as it would significantly reduce the timeline for drilling to be re-initiated. It would also enable the Company to focus on a new Land Access Agreement with the Cañaris Community, which is required prior to drilling. In addition, an extension to our 2014 drilling permit would allow the Ministry of Energy and Mines and the Ministry of Culture to start planning their Consulta Previa ("CP") process for this area, which is also required prior to drilling," commented Joanne Freeze, President and CEO.

The Consulta Previa is the process of Free Prior Informed Consent (abiding by international human rights law), which establishes bottom up participation and consultation of stakeholders, including Indigenous Populations, prior to exploration or development on and around ancestral land. The Company's management and social team has held several meetings and participated in a workshop with the Ministry of Culture this year to better understand the CP process.

**About Candente Copper**

Candente Copper is a mineral exploration company engaged in acquisition, exploration, and development of mineral properties. The Company is currently focused on its 100% owned Cañariaco project, which includes the Feasibility stage Cañariaco Norte deposit as well as the Cañariaco Sur deposit and Quebrada Verde prospect, located within the western Cordillera of the Peruvian Andes in the Department of Lambayeque in Northern Peru.
